Tech Stack: React.js, Node.js, TypeScript, MongoDB, LangChain, Hugging Face, OpenAI API, Python

- Built an **AI-powered personalized learning platform** featuring adaptive assessments using **EMA**-based proficiency analysis and dynamic difficulty-balanced question generation across **3+ difficulty levels**.
- Implemented an **AI-assisted question generation pipeline** using **LangChain + LLMs**, integrating a **MongoDB question bank of 2000+ questions**, AI-based fallback generation, textbook-context retrieval, and CSV export.
- Designed an **intelligent study planner** that generates personalized day-wise schedules across **10+ subjects**, considering topic weightage, difficulty, and student proficiency.
- Developed the **course management platform** with **12+ MongoDB schemas** for departments, grades, subjects, sections, syllabus, examinations, and academic workflows.
- Built **role-based dashboards** for **4 user roles** (Admin, Teacher, Student, Parent), featuring secure authentication, bulk CSV/Excel uploads, automated report generation, and real-time result access.

Projects

UniCom Project

Tech Stack: React.js, Node.js, Express.js, MongoDB, Node-cron, Nodemailer

- Developed a full-stack web application featuring **authentication**, **REST APIs**, and **real-time status tracking**.
- Automated reminder workflows using Node-cron and Nodemailer, reducing pending request delays by **30%**.
- Optimized **MongoDB schema design** and backend query execution for improved scalability and performance.

Neuromancers Official Website

Tech Stack: Next.js, TypeScript, Tailwind CSS

- Developed the **official website for Neuromancers** showcasing the society's team, projects, events, and achievements.
- Implemented a **responsive, theme-aware interface** with improved SEO and performance optimization using Next.js.

Social Media Platform

Tech Stack: C++, STL, OOP, File Handling

- Developed a modular **C++ console social media platform** with authentication (sign up/log in/forgot password), posts, likes, comments, stories, follow/unfollow, personalized feed, trending posts, messaging, and notifications.
- Built **persistent multi-file storage** (users/posts/stories/messages) using **STL** (map, vector) and file handling.
